Telecommunications &  
Electrical Enclosures

Portable Communications

Exterior Lighting

Medical Devices

Wire, Cable & Fiberoptics

Manufacturing Equipment

## APPLICATIONS

Environmental Seals

Outdoor Electrical Gaskets

EMI/RFI Shielding Gaskets

Chip Package & Battery  
Cushions

Automotive Heat Shields

HID Lighting Seals

## ROGERS' BISCO® SILICONES – PERFORMANCE TO THE EXTREME

Whether your design calls for high performance sealing, cushioning or protection - the BISCO Silicones broad portfolio of material options will provide the best design solution for your application.

Our materials are resistant to temperature extremes, UV and ozone, and are extremely resilient to mechanical fatigue. BISCO Silicone materials exhibit excellent compression set and creep resistance, and carry the most stringent UL flame ratings available.

Helping **power, protect, connect** our world™

## WHY CHOOSE BISCO SILICONES?

BISCO Silicones are a full line of cellular, solid and specialty materials produced in roll-stock to be fabricated into gaskets, heat shields, fire stops, seals, cushions and insulation for a wide variety of applications.

BISCO Silicone Materials offer...

- Superior flame resistance
- Low flame, smoke and toxicity upon combustion
- Excellent performance at extreme temperatures
- Superior resistance to compression set and creep

### CELLULAR SILICONES

Available in a wide range of firmnesses, BISCO Cellular Silicones are ideal for sealing, cushioning, vibration isolation and insulation.

- Open and closed-cell offerings available
- Withstand temperatures from -55°C up to 200°C (-67°F to 392°F).
- Unsurpassed compression-set resistance for excellent long-term sealing
- Pass stringent smoke and toxicity regulations
- Meets the most stringent UL-94 flame ratings available, V-0 and HF-1

### SOLID SILICONES

BISCO Solid Silicone materials are designed for high temperature/high pressure gasketing applications. They are available in a range of thicknesses and durometers, offering flexibility in materials selection. Grades are also available with fiberglass reinforcement for added dimensional stability and increased tear strength.

#### General Purpose Solids:

- Range of durometers from 40-70 Shore A
- Grades available with fiberglass reinforcement for added dimensional stability and increased tear strength

#### Performance Solids:

- Range of durometers from 10-40 Shore A
- Tight tolerances and softness, ideal for demanding sealing applications

### SPECIALTY SILICONES

BISCO Specialty Silicone products are designed to meet specific industry needs.

All of our specialty materials can withstand extreme temperatures and meet stringent industry flame tests.

#### Materials Include:

- Acoustic barriers
- Patented fire blocking material
- Silicone coated fiberglass cloth
- Silicone foam combined with fabrics

## TIPS FOR MATERIAL SELECTION

For specific information regarding applications in additional market areas, please contact the Rogers' Solutions Center at 800.935.2940 or 607.786.8112, or visit us online at [www.rogerscorp.com](http://www.rogerscorp.com)

### SPECIALTY SERVICES

Rogers Corporation, High Performance Foams Division, can offer the following value added capabilities to BISCO Silicone material:

#### ADHESIVE LAMINATION

Pressure Sensitive Adhesive options

- Acrylic one or two sides of material
- Silicone one side only

#### MATERIAL SLITTING

Ability to slit minimum width of 0.250" (6.35mm)  
 Width of slit must be greater or equal to thickness  
 Material can be slit with or without adhesive applied  
 Maximum roll diameter is 14" (355.6mm)

## SPECIALTY SILICONES

### THERMAL SOLUTIONS

#### BISCO FIRE BLOCK MATERIALS: FPC

Flame retardant silicone foams designed to protect sensitive components from damage during fires.

Typical Physical Properties				
Property	Method	Detail	Unit	Value
Density	ASTM F 1315	-	lb/ft³(kg/m³)	32 (555)
Surface Flammability	ASTM E 162	Flame Spread Index (I <sub>f</sub> )	-	5
Smoke Generation	ASTM E 662	Smoke Density (D <sub>s</sub> ) - Flaming D <sub>s</sub> -1.5 minutes	-	12
		Smoke Density (D <sub>s</sub> ) - Flaming D <sub>s</sub> -4 minutes	-	40
Dielectric Breakdown	ASTM E 149-90	-	Volts	1100
Dielectric Strength	ASTM D 149-90	-	Volts/mil	9
Arc Resistance	ASTM D 495-99	-	Seconds	140

#### BISCO REFLECTIVE FOAM: RF-120

Reflective silicone foam designed to aid in heat management applications by both insulating against heat and reflecting it away.

Typical Physical Properties				
Property	Method	Detail	Unit	Value
Density	ASTM F 1315	Same as BF-1000 (Foam Only)	lb/ft³(kg/m³)	12 (208)
Aerial Density	Rogers Internal	-	lb/ft²	0.3
Compression Set	ASTM D 1056, Method B	22hrs, 50% Compressed @ 70°C (158°F)	% max	<1
		50% Compressed @ 100°C (212°F)		<5
Surface Flammability	ASTM E 162	Flame Spread Index (I <sub>f</sub> )	-	1

#### BISCO REINFORCED FOAM: IF-200

Abrasion resistant foam that allows users to place the foam in slightly harsher environments while minimizing the potential for tearing the foam.

Typical Physical Properties				
Property	Method	Detail	Unit	Value
Density	ASTM F 1315	Same as BF-1000 (Foam Only)	lb/ft³(kg/m³)	12 (208)
Aerial Density	Rogers Internal	-	lb/ft²	0.3
Compression Set	ASTM D 1056, Method B	22hrs, 50% Compressed @ 70°C (158°F)	% max	<1
		50% Compressed @ 100°C (212°F)		<5
Surface Flammability	ASTM E 162	Flame Spread Index (I <sub>f</sub> )	-	<25

#### BISCO FR PERFORMANCE SOLID: HT-6360

Formulated to be a solid flame resistant material that meets the strictest flammability ratings.

Typical Physical Properties				
Property	Method	Detail	Unit	Value
Durometer	ASTM D 2240	Shore A	pts	65
Tensile Strength	ASTM D 412	-	psi (MPa)	300 (2.1)
Elongation	ASTM D 412	-	%	175
Surface Flammability	ASTM E 162	Flame Spread Index (I <sub>f</sub> )	-	6

## SPECIALTY SILICONES

### ACOUSTIC SOLUTIONS

#### BISCO VIBRATION ISOLATOR: L3-XX40

BISCO L3-XX40 silicone foam technology is the *next generation* in dynamic flooring materials. The L3-XX40 is developed specifically to meet global requirements for flammability, smoke and toxicity while providing superior vibration isolation performance.

Typical Performance Values				
Property	Method	Detail	Unit	Value
Color	-		-	Orange
Thickness	-		mm	4-25
Density	ASTM D 1056		kg/m <sup>3</sup> (pcf)	352 (22)
Compression Deflection	ASTM D 1056	Force Load Measured @ 25% Strain	kPa (psi)	90 (13)
Compression Set	ASTM D 1056	100°C for 22 hours @ 50% Compression	%	<5
Fire Safety (Rail)	NF F 16-101 (French)	Flame, Smoke & Toxicity		
		M2 F1		

#### BISCO SOUND BLOCK: HT-200

BISCO Sound Block materials are silicone elastomers designed to reduce the transmission of sound within interior spaces while preventing the spread of fire and smoke.

Typical Performance Values				
Property	Method	Detail	Unit	Value
Flame Spread (I <sub>s</sub> )	ASTM E 162	-	-	<5
Smoke Density (D <sub>s</sub> )	ASTM E 662	Flaming D <sub>s</sub> -4 minutes		<75
		Flaming D <sub>s</sub> -1.5 minutes		<5
		Non-Flaming D <sub>s</sub>		<5
Oxygen Index	ASTM D 2863	-	%	50
Toxic Gas Emissions	SMP-800C	-	-	Pass
Sound Transmission Loss Rating	ASTM E 90	<b>Aerial Density</b>		
		1.5 lb/ft <sup>2</sup>		29
		1.0 lb/ft <sup>2</sup>		27
		0.75 lb/ft <sup>2</sup>	STC	25
		0.50 lb/ft <sup>2</sup>		22
0.25 lb/ft <sup>2</sup>		16		

## SPECIALTY SILICONES

#### BISCO EMI SHIELDING MATERIAL EC-2130

BISCO EC-2130 Electrically Conductive Solid Silicones are an ideal EMI/RFI shielding solution when high shielding effectiveness is a must. These soft, conductive materials offer exceptional compression force deflection to increase design flexibility for all types of enclosures.

Typical Performance Values				
Property	Method	Detail	Unit	Value
Specific Gravity	Internal	-	g/cc	1.97
Hardness	ASTM D 2240	Shore A		30
Tensile Strength	ASTM D 412	-	psi	50
Elongation	ASTM D 412	-	%	50
Volume Resistivity	Rogers Internal	-	Ohm-cm	<1
Shielding Effectiveness	MIL G83528	100 MHz	dB	100
		500 MHz		100
		1 GHz		110
		10 GHz		85

#### FIBERGLASS REINFORCED SILICONE HT-1500

Designed for press pad and high strength gasketing applications where durability and tear resistance are critical.

Typical Performance Values				
Property	Method	Detail	Unit	HT-1500
Durometer	ASTM D 2240	Shore A	pts	75
Compression Set	ASTM D 395(B)	70 hr @ 150°C (302°F)	%	25
Breaking Strength	ASTM D 412	-	psi (MPa)	300 (5.3)
Low Temperature Embrittlement	ASTM D 2137	-62°C (-80°F)	-	Pass/No Cracks
